DRAFT

# **Kerslake Action Plan Milestones Status**

### Summary:

This is the first Kerslake action update in this format. It highlights how well the Council is doing to deliver the recommendations made within the Kerslake report. We will update the report on a monthly basis. The report highlights that we are making good progress with a significant number of the actions, all be it that some started later than we would have liked. As our stance to partnership working has changed to a more collaborative approach we are suggesting that some of the partnership deadlines are moved to fit more appropriately with this stance. The Kerslake Milestones Completion Tracker graph dotted line demonstrates this change.
